SOCIAL FACTS BY CENSUS TRACTS

PRICE 1.00

The Research Division of THE UNITED COMMUNITY SERVICES OF METROPOLITAN BOSTON presents herewith, under the general title of "SOCIAL FACTS BY CENSUS TRACTS", selected items from the 1950 U. S. Census of Population and Housing for the tracted area of Metropolitan Boston. This area comprises 83 cities and towns, divided into a total of 465 tracts. The three Tables published by the U. S. Bureau of the Census tabulate 251 items for each tract. From these, 55 items have been selected by the U. C. S. Committee on Census Data as of major importance for our studies. Figures for other items for specific tracts can be obtained from the Boston Regional Office of the U. S. Department of Commerce, 40 Broad Street, Boston; Hubbard 2-6200. The price of the complete Metropolitan document is 60 cents.

A Census Tract is a sub-division of a municipality (or in some cases an entire town) delineated for statistical purposes by the U. S. Bureau of the Census through cooperation with a local committee - in this case, the U. C. S. Census Data Committee. Tract areas were established with a view to approximate uniformity in population (usually 3,000 to 6,000); with some consideration for homogeneity in economic and housing characteristics, and with due regard for natural features.

Any Red Feather Agency or other organization interested in analysis of a given neighborhood comprising one or more tracts can compile for comparison with these data specific data on any one or more of a number of subjects, such as births, cases attended by visiting nurse, children attending summer camps, juvenile delinquency, memberships in various kinds of organizations, persons participating in specific group and recreational and educational activities, public relief cases, etc. Street Indexes, (House Numbers by Census Tracts) are available for the cities and towns in the U. C. S. area, and can be obtained through the U. C. S. Research Division. Any list of addresses can be distributed among Census Tracts by the use of these Street Indexes.

Social Agencies have made use of Census Tract data in the following ways:

- To sample coverage by geographic location of the services of each agency.
- To relate agency service to total and district populations. (For example, agencies for the aged can see extent of their services in areas of high percentage of aged, provided that they have 1950 census data.)
- To relate agency services to total community services.
- To enable Functional Councils and community planning groups to perceive areas in need of augmented services.
- To aid the integration of social planning, fund raising, and allocations.
- To facilitate answers to schools, churches, organizations and individuals for sociological and demographic data. (Necessary tools are Census Tract data, plus community data and annual facts from local Health Council and local Real Property Inventory.)
- To permit evaluation of trends in service needs and problems for annual tabulation of comparable data - thus resulting in sounder social planning.

CENSUS TRACT MAPS OF MUNICIPALITIES IN METROPOLITAN BOSTON AREA

A special map has been prepared of each municipality in the metropolitan Boston tracted area which contains two or more tracts. The Massachusetts Geodetic Survey maps from which these were developed are all designed for publication in 11 x 8½" sheet form. They vary, therefore, in scale and in north point. There are 42 single-tract municipalities for which no special maps are necessary.

Maps are available for the following municipalities:

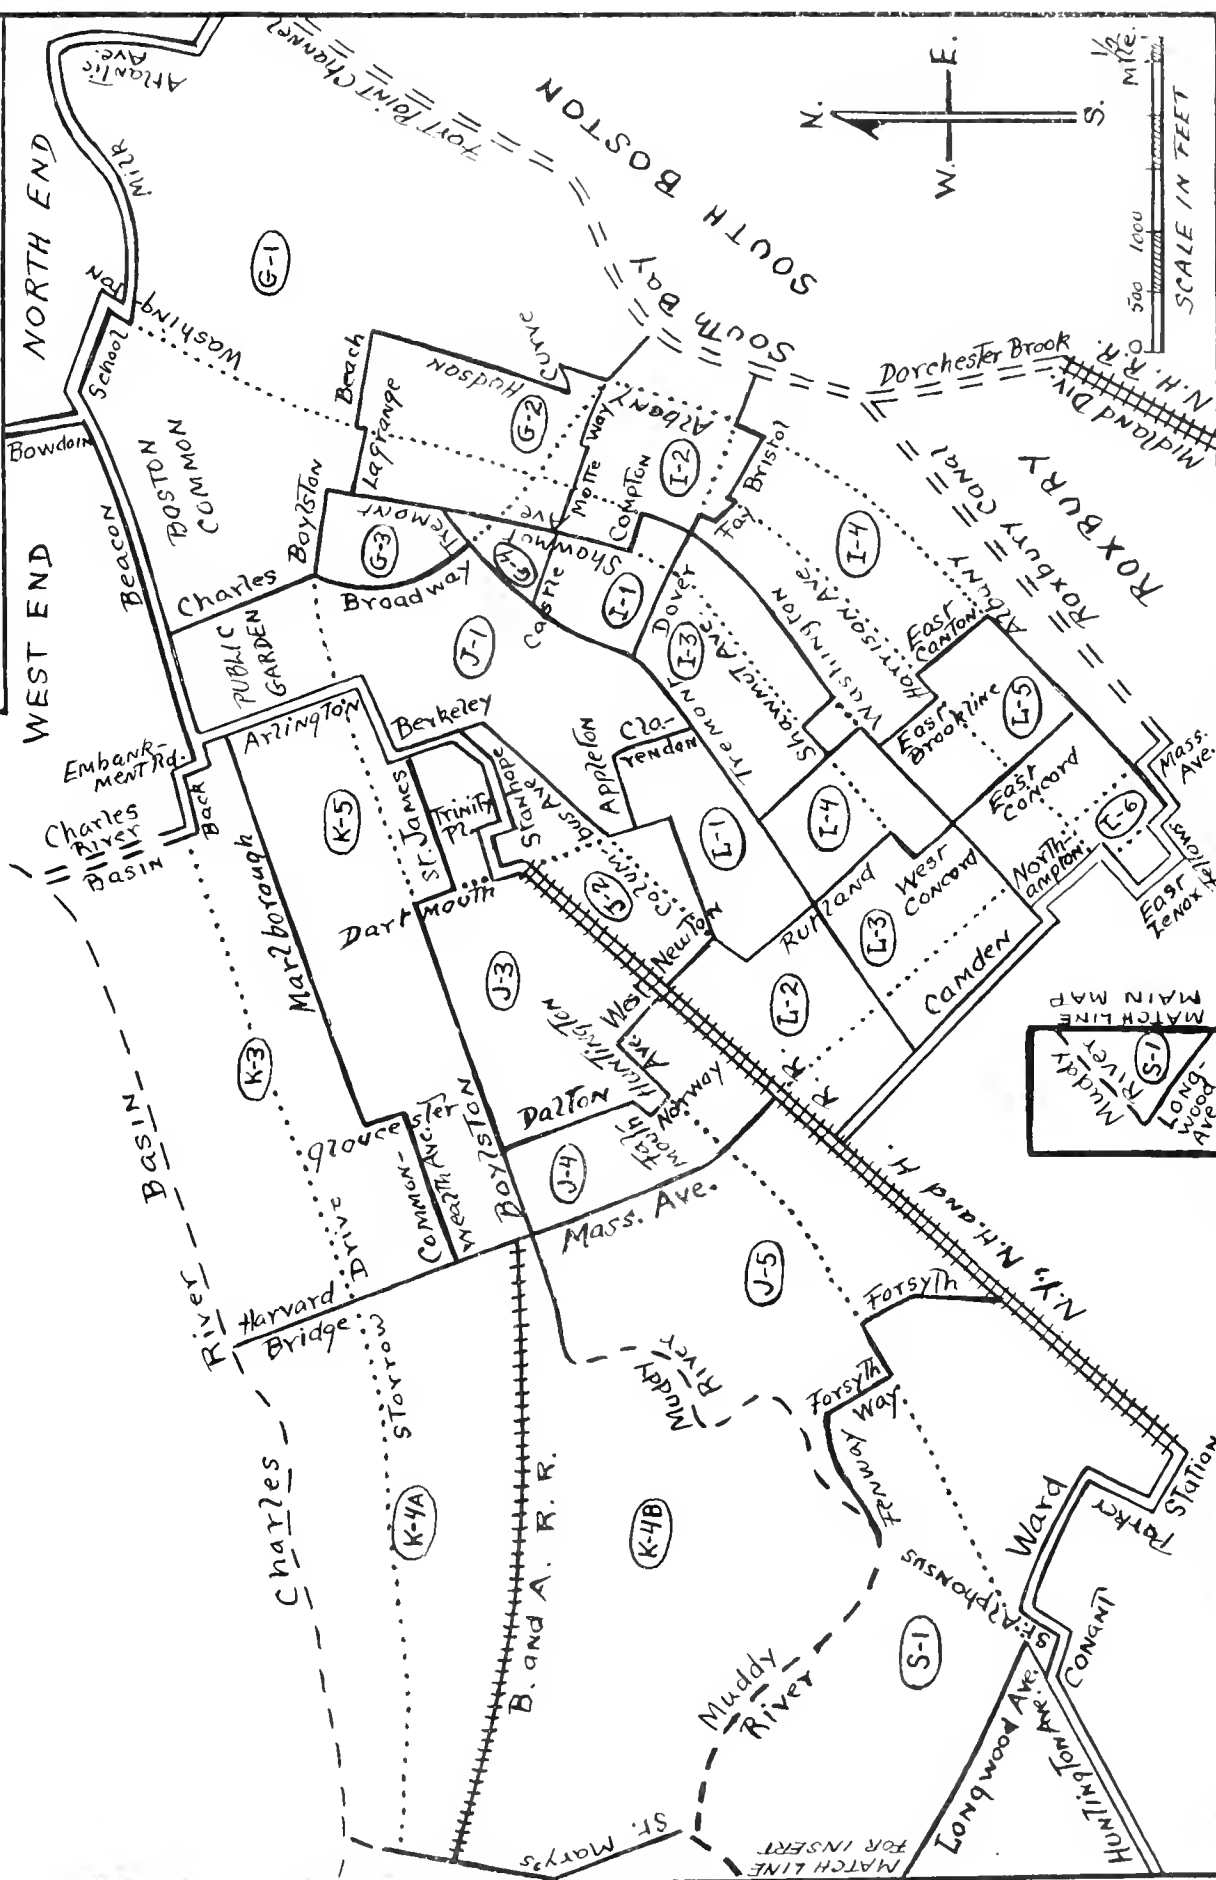

Arlington	Cambridge	Lynn	Norwood	Stoneham
Belmont	Chelsea	Malden	Peabody	Stoughton
Beverly	Danvers	Medford	Quincy	Wakefield
Braintree	Dedham	Melrose	Randolph	Waltham
Bridgewater	Everett	Milton	Revere	Watertown
Brockton	Framingham	Natick	Salem	Wellesley
Brookline	Hingham	Needham	Saugus	Weymouth
Boston	Lexington	Newton	Somerville	Winthrop
				Woburn

The tract data and maps in this series of studies may be used in any combination of municipalities for Area studies of any section of metropolitan Boston. Comparisons of one part of a given municipality with another part of either the same or another municipality can also easily be made. Moreover, the selected items give the basic data from which special social or other data can be developed and correlated.

KEY TO READING OF MAPS

- Scale is given in each case in thousands of feet. North point is shown on all maps.
- Dashed lines indicate artificial municipal boundaries.
- Solid lines indicate streets forming tract boundaries. Names of streets are lettered parallel to streets wherever possible. NOTE - In a few cases solid lines denote tract boundaries formed by park, cemetery or institutional property lines, and are so identified.
- Double lines indicate waterways or shore lines.
- Dotted lines indicate major street extensions for map clarification, or connecting links between two tract bounding sections of the same street.
- Cross-hatched solid lines indicate railroads where they are tract boundaries. Railroad extensions for map clarification are shown by cross-hatched dash lines.
- Blocks indicate county and tract number within county. (BC-Bristol; MC-Middlesex; NC-Norfolk; PC-Plymouth; SC-Suffolk.) Boston tracts are numbered within A-Z letters.
- Capital words indicate adjacent municipalities.

TABLE I - CHARACTERISTICS
OF THE POPULATION

1. Population - 1950	3,250
2. Population - 1940	2,275
3. Percent of Change	+42.8
4. Male Population - 1950	1,639
5. Non-White Population	2
6. Foreign-Born White Pop.	449
7. No. of Married Couples*	750
8. Couples with their own household*	675
9. Households - Total Number	809
10. Institutional Population	-
11. Persons 1 yr. old or over*	3,190
12. Item 11 - Same residence in 1950 as in 1949*	2,730
13. 25 yrs. or over - median school yrs. completed*	11.2
14. Total No. of Families and unrelated individuals*	890
15. No. Incomes under \$1,500*	210
16. From \$1,500 to \$2,999	235
17. From \$3,000 to \$4,499	275
18. Incomes \$4,500 and over	150
19. Median Income**	\$2,944

*Statistics based on 20 percent sample.

**Medians computed from 14 class intervals for income; 8 class intervals for rent.

¹Median not shown where base is less than 100.

TABLE II - AGE AND ECONOMIC CHARACTERISTICS

1. Persons under 5 yrs. old	370
2. Persons 5 - 13 yrs. old	599
3. Persons 14 - 19 yrs. old	346
4. Persons 65 yrs. old or over	240
5. Persons 21 yrs. old or over	1,883
6. Persons 14 yrs. old or over	2,281
7. No. of Item 6 in Civilian Labor Force	1,126
8. No. of Item 7 employed in month of April, 1950	1,058
9. Professional, Technical, and kindred workers	65
10. Managers, Officials, and Proprietors (inc. Farms)	82
11. Clerical and kindred workers	140
12. Sales Workers	52
13. Craftsmen, Foremen, and kindred workers	259
14. Operatives and kindred workers	221
15. Private household workers	9
16. Service workers (except household)	68
17. Laborers	89

*Statistics based on 20 percent sample. Median not shown where base is less than 500.

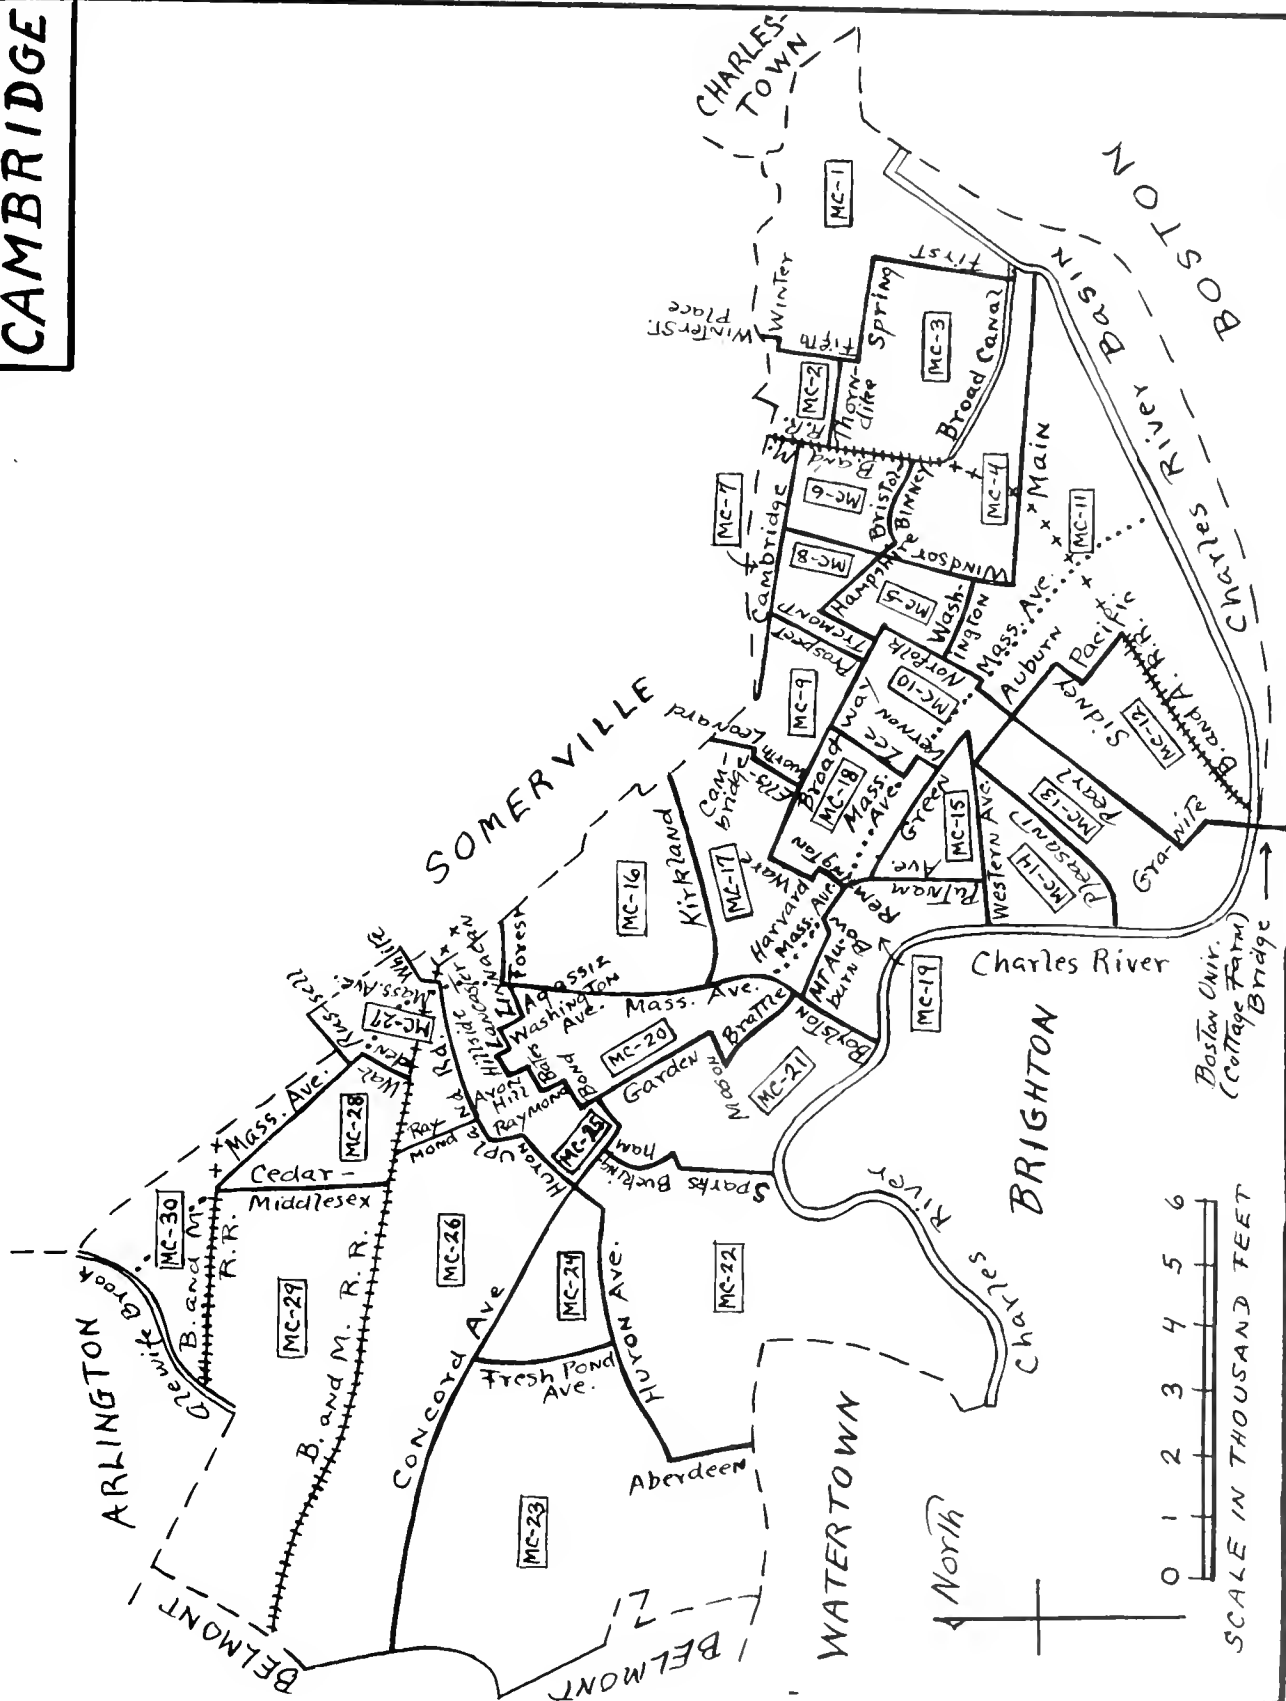

**Medians computed from 14 class intervals for income; 8 class intervals for rent.

¹Median not shown where base is less than 100.

TABLE III - CHARACTERISTICS OF DWELLING UNITS

1. Total Dwelling Units	914
2. Total Occupied Units	809
3. Owner-occupied Units	651
4. Single detached Units (including Trailers)	788
5. Median value of Singles ¹	\$6,850
6. Total Units in Five or more unit structures	10
7. Total Units reporting condition	891
8. Units with no private bath or no running water or dilapidated	265
9. Units built 1919 or earlier*	190
10. Units built 1940 or later*	225
11. Median persons per occupied unit	3.4
12. Units reporting 1.01 persons per room or more	139
13. Units reporting central heat*	550
14. All units reporting rents (Both rented and rentable)	136
15. No. rentals under \$20	27
16. From \$20 to \$39	68
17. From \$40 to \$59	26
18. Rentals \$60 and over	15
19. Median contract monthly rent** ¹	\$28.82

A hand-drawn map of Hingham, Massachusetts, and its surrounding areas. The map is oriented with North at the top, indicated by a compass rose. The town of Hingham is the central focus, with its coastline and major roads labeled. To the north, the towns of Scituate, Cohasset, and Norwell are shown, separated from Hingham by dashed lines. To the east, Weymouth is shown, also separated by a dashed line. To the south, Hull is shown. The map includes several geographical features: the Back River, Fresh River, and East River are labeled; the Back River flows into Weymouth Bay, which then flows into Hingham Bay. The Fresh River flows into Hingham Bay. The East River flows into Hingham Bay. The map also shows the location of the Hingham Harbor Lines, which connect Hingham to Hull. The map includes a scale bar indicating distances in thousands of feet (0 to 6) and a north arrow. Two points of interest are marked: PC-2 is located in Hingham Bay, and PC-3 is located in the area between Cohasset and Norwell. The map is titled 'HINGHAM' in a box at the top left.
